# Sprint 3

Aim:

The main goal the sprint 3 is to set the medicine schedules and to receive the medicinal reminder notification at the scheduled time.
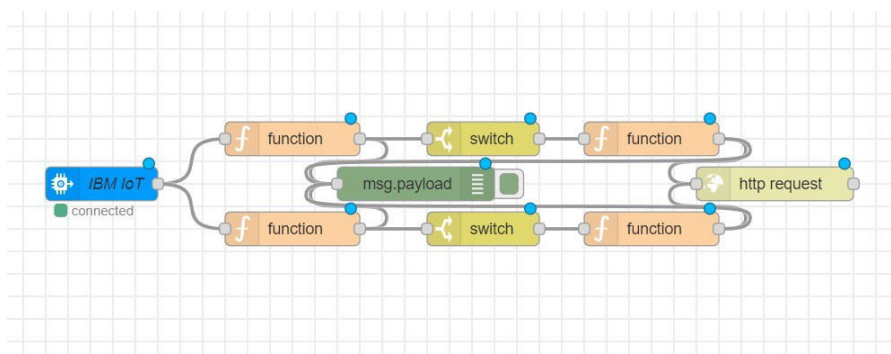

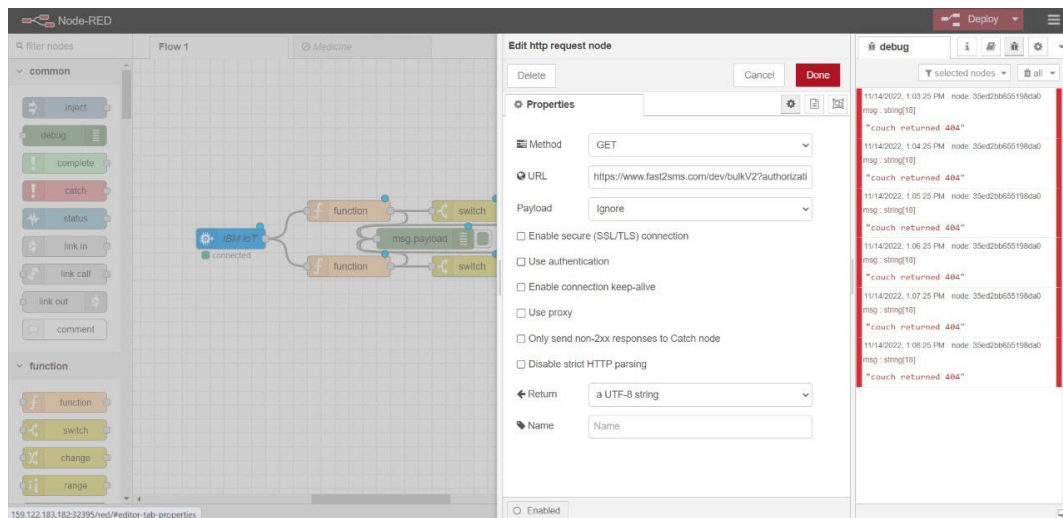

Procedure:

- Create an account in Fast2Sms

- Configure API using auth tokens

- Configure Node-Red API using Http request

- When the data is triggered in IBM watson NodeRed will capture the data and using the https request palette

- The obtained data is being sent to functions to customized according to our needs and deliver them using a get request.
